

Pre-Cap

www.mftnational.com

Description

Pre-Cap is a premier Ecologo/CRI approved carpet pre-conditioner that is used in the hot-water extraction process.

Pre-Cap is a low-foam encapsulate that blends detergent emulsifiers with a unique crystallizing polymer. The product facilitates thorough and effective soil removal leaving no soil-attracting residue.

Pre-Cap is designed to be used as the restorative element of an over-all carpet maintenance program that utilizes MFT Encap-Tech.

The product is applied using either conventional pump sprayers, hydro-force or by mechanical agitation (using a variety of carpet scrubbers).

Note: Check carpet warranties to select the appropriate mechanical agitation.

Mixing Directions

Depending on soil conditions present:
Mix 1 - 4 oz of Pre-Cap to 1 gal of water (30 - 120 ml to 3.79 L)

Application Coverage

Depending on soil and wear condition of the carpet:
Apply 1 gallon of mixed Pre-Cap to approx 500 sq ft of carpet (46.5 sq m/3.79 L)
Leave Pre-Cap to dwell for 5 minutes
Extract using hot water extraction method
